

Kampong Phluk

Kampong Phluk - is situated about 25 kilometres east of Chong Khneas, and is less visited by tourists. This is a small village of stilted houses, which gives you a very good insight into the fish-economy based life on Tonle Sap. The flooded forest surrounding the village is the main attraction, but is at its best for only about four months a year (August-December). There is a big difference if you visit the village in the wet season compared to the dry season. Where you can walk during the dry season is only reachable by boat in the wet season.
